

STOLEN BOATS CANADA

(Public Service- Non Profit)

BOATING SAFETY

When launching and recovering your vessel, check the tides, have knowledge of your vehicles capabilities, the characters of the ramp and what type of surface is under the water. If your vehicle gets stuck, do not put yourself or others in danger of getting trapped under your vehicle in an attempt to free it. Contact a professional tow company in “ample time” to avoid damage to your vehicle, potential injury and environmental damages.
