WATER SPORTS SAFETY

Stand Up Paddle Boarding has become one of the most popular water sports going. With the right gear, people are on the water all year round. Along with good cold weather/water protection, there is specific safety gear required by Transport Canada while you are using your SUP to navigate. (Transiting from Point A to Point B).

An approved PFD for all on the board

A Sound Signaling Device

A 15 M Buoyant Heaving Line

****A Water Tight Flashlight if operating in limited visibility or in the dark.***

It is always a good idea not to paddle alone. Be aware of tides and vessel traffic hazards in the area and anticipated weather changes. Wear your board leash, let others know when and where you are headed out on the water, when you anticipate returning and check in on your return.

4th DIMENSION PADDLES

4th Dimension paddles use primarily red cedar for its inherent strength to weight ratio. Paddle blades incorporate reclaimed wood that is strong and visually compliments the finished product.
